Chemistry PPE Revision tasks

Revision Schedule

Task 6 – Required practical – making salts

Resources

AQA Specification (available online):

4.4.2.3 Soluble salts. Chemistry Required practical 1

Collins Revision Guide

BBC Bitesize - https://www.bbc.com/bitesize/guides/zrpdw6f/revision/1

Task

1. **Watch the required practical video for 'making soluble salts' on: www.freesciencelessons.co.uk**

   Or on the youtube website below (it is the same video)

   https://www.youtube.com/watch?v=9GH95172Js8

   OR read up on it in your revision guide.

2. Now write out a method to describe how to carry out this practical. You should include the a risk assessment and a word equation to represent the reaction (Hint – you could use copper oxide and sulfuric acid but there are other options too)
