

# VIRTUAL OPEN DAY

Monday 15<sup>th</sup> June, 5.30pm

Exeter Maths School (EMS) is an Ofsted Outstanding, state-funded sixth form specially designed for young people who love maths, physics and computing. We're open to enthusiastic and adventurous students from all over Cornwall, Devon, Dorset and Somerset – and offer great accommodation if you're too far away for a daily commute.

Our pioneering formula is all about freeing you up to explore the subjects you love inside out. That means fewer rules, more mind-bending maths challenges and a really supportive, family ethos that allows you to be yourself.

We are delighted to be hosting a Virtual Open Day for prospective students and their families.

The event is aimed at Year 10 students but is open to students from all year groups from Devon, Dorset, Somerset and Cornwall, who are starting to consider their options for A-levels. Our Head will be leading an information session and a video link will show you around the school and introduce you to members of staff.

The Open Day offers an excellent opportunity to learn about our unique curriculum and specialist offering. If you love maths and want to be challenged, this could be the school for you!
